

## **EQUIPMENT ACQUISITIONS**

Acromil Corporation has acquired a new DEA ALPHA IMAGE Coordinate Measuring Machine. The Alpha Image is a direct computer controlled gantry measuring machine with a measuring length up to 40 feet.

The innovative gantry design offers high throughput with high accuracy and reliability utilizing PC-DMIS CAD software. PC-DMIS CAD is an interactive graphics measurement software that can be linked to virtually any CAD system. Programs are created directly from a CAD model supplied by our customer.

The new machine is set to be delivered 3/1/08 and installed and calibrated by 4/15/08.
